

XM radio is a godsend to the average person. I prefer to pay money versus being inundated with ads for products I don't use, don't want, don't like and just plain don't care about..... Not to mention the near - endemic FILTH that "DJs" spew in order to up their ratings, polluting not only my ears but those of my teenagers, etc.

What kind of government restricts access to by-choice music, etc. Is the US a totalitarian state now? It's bad enough to live in AmeriKa where I can't even do something wierd to my car for fear I'll be singled out to be arrested if I so much as go 5 miles above the speed limit. Don't take away our right to listen to good music, etc.

PS I'm an ordinary American-born person - if I was an immigrant I'd really be freaking out - our culture on "free radio" has become POISONOUS !!!
